

Fewer than 1,000 meteoric falls have been recorded throughout the world, although the earth is struck by at least 1,000 meteors every year.

WORLD HAPPENINGS
BRIEFLY TOLD

The New Zealand government will transfer men from public works to farm work as a means of increasing production.

Alberta's fur production for the year ended June 30 was valued at \$134,128, an increase of about \$100,000 over the previous year.

The Danish newspaper, Copenhagen reports from Berlin that the transportation of 650,000 Jews to a reservation in Poland has begun.

Robert Ley, leader of the Nazi labor front in Berlin, announced that a 10-hour day would be established in essential industries.

Germany is seeking a monopoly on Roumanian oil, Oliver Stanley, president of the board of trade, told the House of Commons as part of a trade drive in the Balkans.

Viljalmar Stefansson, widely known explorer, said Arctic air routes to China, India and Russia are in the making and may become realities soon.

Men serving in the Canadian navy, as well as those in the British army, other dominion navies, will get Christmas cards from the King and Queen.

An official report presented to the ministries of war and commerce charged Bulgarian workers sent to Germany to work in the Hermann Goering steel factories were being mistreated and unfed.

The Aga Khan, only living ruler who has won the Derby three times, and has headed the winning owners' list on seven occasions, has reduced his racing investments because of the war.

A London, Ont. resident received a letter from his sister in Scotland which was enclosed a small advertisement from a newspaper in a town on the east coast. The ad said: "Comfortable rooms to let. Excellent view of air raid. Terms moderate."

The Combination Worked

London Man Solved Household Problem To His Own Satisfaction.

An "evacuation widower," struggling with household problems, has discovered a novel way of washing his own clothes.

A London storekeeper said the man came in to buy some soap powder, "telling us he had decided to have a grand washing." The next time he came shopping, we asked him how he managed to do it.

"Oh, it went off splendidly," he said. "I took the clothes into the bathroom and filled the tub with hot water. Then I stirred the soap powder in the water and dumped the clothes in. But leaning over the bath made my back ache and the hot, soapy water looked so inviting that I undressed and got in the bath with the clothes. It was so much easier to wash them this way, and I can't think my wife has never thought of it."

The High Silk Hat

First Weaver Was Arrested For Inciting Riot In London

The bowler hat, known in this country as the derby, got its British name through having first been made more than sixty years ago by William Bowler, of St. Stephen's Lane, London, to the design of a Norfolk farmer. The bowler or derby is popular in Britain and has many adherents in Canada. The bowler is a symbol of solidity. The high silk hat represents lofty social standing.

John Herberington invented the "topper" in London some 140 years ago. When he first wore it, he was arrested for inciting a riot; the complaint was made that his headpiece was frightened by its sheen.

A century ago a Frenchman, Anatole Gibus, contrived a "topper" of paper. This is the only successful mechanical device in the hat business and the inventor's family receives royalties from it. High hats are made by hand.

Precautions Necessary

Warning To Users Of Telephone In Military Quarters

Defence headquarters have issued a warning to all ranks that users of telephones must remember at all times that conversations may be overheard.

"No subject, the contents of which might be of value to the enemy should be discussed over an open line," says the warning. "The consequence of such indiscretion may be the loss of many lives."

Copies of the warning are being placed on all military telephones, both in offices and in the field.

Honey nuts are served at wedding banquets in Mexico.

Dust Storms
Small Organisms In The Soil Are Beneficial For Hay Fever

They micro-organisms which make soil fertile were described as great potential agents in causing hay fever.

When dust storms sweep over large areas of the western United States and Canada they carry with them billions of microscopic mold particles, similar to those found in yeast, and cause the sniffs and violent sneezing characteristic of hay fever, the association of allergists for mycological investigation reporting.

The association has organized a network of observation stations throughout the midwest and officials said its studies to date indicate mold particles may prove as important as the pollen of various flowers and weeds in causing hay fever.

These particles are extremely small, about 1/10th of the size of a grain of ragweed pollen, which can be seen without aid of a microscope, but when a few of them are breathed into the nose they may begin to grow and set up irritation.

The infectious thing about such mold infections is that the particles are in the air all the time and not just at particular seasons of the year, like plant pollen. Dr. Marion Morrow and E. P. Lowe of the University of Texas declared. As a result of these studies, the mold pollen and molds have hay fever throughout the year.

Well-Deserved Honor

Windsor's Air Pilot To Be Named After Late W. F. Herman

The *Leithbridge Herald* says: One newspaper publisher is to get the recognition that he deserves, and this is the late W. F. Herman of the Windsor Star. Windsor's new airport is to be named after him. Herman was a public-spirited publisher; his Windsor paper moved ahead progressively. Herman and the paper he founded deserve a lot of credit. He was an advocate of every new idea that had to do with the betterment for his native settlement. It is right that his name should live in some-thing, a memorial to his other generations that the worth of public-spirited individuals is recognized. Too often the service of this kind of citizen is entirely forgotten.

SELECTED RECIPES

CRISSE CROSS CHERRY PIE

1 Cup canned cherries
1/2 cup cherry juice
3 tablespoons cornstarch or Canadian Corn Starch
2 cups boiling water
2 tablespoons Crown Brand Corn Syrup
1/4 teaspoon cinnamon

Temperature: 400-325 degrees F. Time: 40 minutes.
Line a 9-inch pie plate with hot pastry; brush over with white of an egg. Pour in the cherry sauce and mix into paste. Drain cherries from the syrup. Drain the bottom of pie plate. Pour in the cherry sauce and mix into paste. Drain cherries from the syrup. Drain the bottom of pie plate. Pour in the cherry sauce and mix into paste.

Fluffy Cottage Pudding

2 cups sifted Swiss Down Flour
2 teaspoons Calumet Baking Powder
1/2 teaspoon salt
1/2 cup milk
1 cup sugar
1 cup milk

Sift flour once, measure, add baking powder and salt, and sift again. Sift milk, add sugar gradually and cream together well. Add flour mixture to milk mixture. Bake in greased pan, 8x8x2 inches, in 60 minutes or until done. Serve hot with Apricot Cord Syrup.

Decides On Rationing

Food Ministry Announces Britain And Land First On List

R. M. Morrison, British minister of food, announced his ministry had definitely decided to ration butter and lard.

He indicated recent shipping losses in the North Sea would have no bearing on this decision. The food ministry is not the sole importer of practically all foodstuffs. It has negotiated contracts for purchases of considerable quantities of meat, cheese and lard with South American countries, and various Empire states. All measures taken thus far are functioning satisfactorily.

Wednesday is the Assyrian Sabbath.

Army Rations

Canadian Soldiers Are Given A Good Balanced Diet

Canadian soldiers enjoy an ample balanced diet which is a far cry from the bully beef and plum and apple jam of overseas service in the first Great War.

The standard army ration in 1939 calls for most three times as much with plenty of vegetables, cereals, soup, bread and butter and fruit.

So taken are new recruits with the army diet that they almost eat their heads off for the first few days but later ease up a bit. Their food, the ample quantity allotted is evidenced by the fact most units in the Canadian active service force draw less than their allotted quantity of food after they have been in barracks a short time.

Here is a typical daily menu for troops in the Ottawa district:
Breakfast—Porridge, bacon and beans, bread and butter, jam, coffee.
Dinner—Pea soup, roast beef, mashed potatoes, carrots, bread and butter, jam, tea.
Supper—Cold beef, cold potatoes, bread and butter, stewed prunes, tea.

In addition to this most units arrange privately for extra such as cake and pie from time to time.

The menu varies from day to day. Fish is served in place of meat once a week and mutton and pork dishes are rotated with beef. Instead of fresh vegetables, canned tomatoes or canned corn are served from time to time. Rice replaces prunes on the supper menu at times and corn syrup replaces jam on the breakfast and dinner menus.

HOME SERVICE

PUT YOUR BEST SELF IN YOUR LETTERS

MAIL ORDER SERVICE

Pattern 4290 is available in sizes 32, 34, 36, 38, 40, 42 and 44. Size 36 takes 3 1/2 yards 35 inch fabric and 5 yard contrast.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly: Mrs. Name, Address and Style Number, and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper, Union, 153 McDermott Ave. E., Winnipeg.

Writing Tips Show How

Why doesn't he answer her letter? She'd hoped so much to keep her name in the mailbox.

But then the mailbox was usually empty for those who have never learned the simple art of writing friend-winning letters.

No one likes to reply to a trivial, stiffly-phrased note full of excuses like "There isn't any news here."

It was always news if you look for it. glance out the window will give a tip.

"Our maple tree is a great secret," you may write, "and the weather is just right for a winter sport. So why not make that promised visit now?"

To avoid stiffness—go lightly on sentences beginning with "I." Instead of "I was glad to hear your news," say "You were so great." You make a better impression.

Don't write "sincerely" for "sincerely yours." Or "in regards" for "in regard to."

Or are you in doubt about correct form for invitations, letters of appreciation? Our 32-page booklet gives helpful samples of these and many other letters, with pointers on correct English, lively words, letter etiquette—to help you write top-grade letters.

Send life in coins for your copy of "Good Letter-Writing Made Easy" to Home Service Dept., Winnipeg Newspaper, Union, 153 McDermott Ave. E., Winnipeg, Man.

The following booklets are also available:
115—"Best Exercises for Health and Beauty."
165—"How to Weave Useful Novelties."
113—"Secrets of Successful Candy Making."

GIRL-DEVELOPING MISS' DRESS

By Anne Adams

Stop right here... if you're looking for a frock that's practical, yet feminine, and that will last you for years, look no further than the Anne Adams pattern 4290.

Pattern 4290 is available in sizes 32, 34, 36, 38, 40, 42 and 44. Size 36 takes 3 1/2 yards 35 inch fabric and 5 yard contrast.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly: Mrs. Name, Address and Style Number, and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper, Union, 153 McDermott Ave. E., Winnipeg.

Under the command of Wing-Commander R. Collie, a "clearing house" has been established at the Canadian National Exhibition grounds in Toronto for the thousands of trained men needed in the scheme for fighting of Empire air pilots in Canada.

The men engaged in the "manning pool" are being trained in all the skilled branches of aeronautics and mechanics that are required to keep fighting planes serviceable.

It was stated that it requires about 10 skilled men on the ground to keep each airplane in fighting trim in the air. That is the job of the men who are coming from all parts of Canada for training at the Toronto station.

Youthful would-be mechanics and aeronautics experts from all parts of the Dominion are being sent to the scheme for training of the "manning pool" and it is expected that each year there will be a regular turnover of hundreds of skilled "airmen," although they do not actually fly.

Silk was not known to the Greeks and first came to Rome during the early days of the empire.

Niagara Falls, although the most famous in the world, stands eleventh in the list of actual height.

NEW INTERNATIONAL HARVESTER COMPANY BUILDING

Progress in Canada during war years should be given recognition—that why we publish the picture of this new building of the International Harvester Company now under construction in Toronto. Costing nearly \$200,000, it will be completed by March 15, 1940, and is 150 x 337 feet and two stories high. It will be used as a new motor truck sales and service branch house. The frontage is on Balmistr street, sides extending along Stewart and Wellington streets. The main factory of International Harvester in Canada is at Hamilton, Ont.

SUNDAY SCHOOL LESSON

DECEMBER 3

SPREADING THE GOOD NEWS

Golden text: He that heareth, let him say Come. Revelation 22:17. Lesson: Matthew 10. Devotional reading: Psalm 103:1-5, 8-12.

Explanations and Comments

The Disciples Sent Forth To Preach the Kingdom of Heaven at Hand, Matthew 10:1-3. Warned and Comforted, 10:9-33. Jesus taught his disciples to take things with them on their journeying—money, bag for food, extra coat, shoes, staff, etc.—but he was worthy of being carried for physically by those whom they cared for spiritually, if no one else was glad, they were to be glad for themselves, if no one else was glad for them.

Another reason for feeling safe in the midst of persecutions, Jesus gave: they are under God's constant care. The apostle wrote: "I have sold for a penny, yet two men are shut out from the kingdom of heaven because of one who is lost." But God is the God of the minute as well as of the infinite—as the statement that the Father who hears your head and shoulders hears your heart as well as your body. They must put their trust in their Heavenly Father, and in Jesus, who promises that if they confess him before men, acknowledge him as their Master, he will confess them before his Father.

Another reason for feeling safe in the midst of persecutions, Jesus gave: they are under God's constant care. LEAGUE OF CANADA
presents
TOPICS OF VITAL INTEREST
by DR. J. W. S. McCULLOUGH

VITAMINS IN INDUSTRY

Much has been heard, in the past few years, of the discovery that a lack of Vitamin A causes "night blindness". In spite of the fact that Vitamin A is abundant and widely distributed—particularly in milk, cream and butter, carrots, leaf lettuce and spinach; eggs, liver and kidney—many persons apparently do not get an adequate supply. As a result growth is retarded and weight becomes stationary. Lack of the vitamin, too, may lead to bad teeth.

But vitamin A has been noted for its effects upon the eye. This vitamin, as we have found, regenerates the "visual purple", a substance in the retina which is indispensable in seeing.

It was this fact which prompted the managers of the Westinghouse plant in Mansfield, Ohio, to administer Vitamin A wherever there was marked eye fatigue. After two years' experiments, Ralph T. Blahie, Chief Engineer, has reported to the Porcelain Institute Enameling Forum at Ohio State University, the following results:

Assembly line rejections because of "off color" were reduced from an average of 1.7 per cent to an average of .15 per cent, or 91 per cent. The quality of finished products was improved, and complaints of "off color" were reduced to .15 per cent.

As much as \$5,000 a year was saved in the correction of defective ranges alone. The appearance of the enamel was improved. It might be supposed that white is white and that enamel would be enamel, but it was found that white is a rare color. There are as many shades of white as there are of blue. It helped a little to insure accuracy of comparison by testing all color matters for visual defects. But since rejections still occurred, the conclusion was inescapable that some matters suffer from forms of eye fatigue that could not be detected by the regular tests. So it was decided to administer Vitamin A in the form of carotene in milk, but only when the color matter rejected foods rich in Vitamin A because he did not like them.

Editorial Note: Readers desiring the complete set of Dr. McCullough's 12 "more articles" as well as may secure same by writing to: League of Canada, 105 Bond St., Toronto, Ont.

Continue Education

Members Of Naval, Land And Air Forces Can Pursue Studies

Young men of the naval, land and air forces of Canada will be able to keep each other abreast of their educational studies even though on active service, it was announced at a special meeting of the directorate of the educational branch of the Canadian Legion War Services.

This was made possible by collaboration with the Canadian Association for Adult Education and with the support of the departments of education of nine provinces, as well as the universities and municipal authorities in all parts of the Dominion.

It was stated that this consideration is being given in some localities to correspondence courses leading to matriculation and the bachelor of arts degree.

"I believe they will make good soldiers," said the speaker. "For I have often felt that we as Canadians have no right to play a dog in the manger game. If we do not use these great open spaces we have no right to retain them and we should not wonder if dictators of Europe court these lands for the overbearing populations of Europe and Asia. And so we welcome our British friends, happy in their longed-for liberty and sought-for freedom, may we help them to be good Canadians by helping to weave them into our national life."

At His Hat
Journalist in London Harold Brown offered to set his hat at its student's feet. The student did it and called on Brown down the straw topper. They forgot that he was a chemistry teacher, too. He connected a brew that reduced the sandwich-appraisal consistency, spread it on crackers and ate it.

If the earth stopped moving in its orbit, it would fall into the sun within two months.

TRIBUTE IS PAID TO WAR EFFORT OF DOMINIONS

London.—Tribute to the war effort of the Dominions was paid in the speech from the throne read at prorogation of parliament.

The exiguities of war necessitated all colorful ceremonies traditionally attached to prorogation being abandoned. The King did not attend in person, and the speech was read by the lord chancellor, Viscount Caldecote.

"The issue is clear," the speech from the throne said of the war the empire is waging against Germany. "With united will, my people here and overseas have dedicated themselves to the struggle. The spontaneous decision of my Dominions to participate in the conflict and the invaluable help which they are giving, and are about to give, to the common cause have been the greatest encouragement to me.

"With the aid of our faithful French and Polish allies, we cannot doubt that our cause will prevail." The new session of parliament will include a bill to amend the act of 1914, the first since the last war. It was initiated the government will agree to the Labor party's plea for a secret sitting to discuss supply and munitions.

The Labor party wants assurance from the government that the industrial resources of the nation are being used for the best advantage in providing war supplies. The speech was given after the Labor party had been agitated before for secret sessions but the government opposed them. It is understood that the speech will be given by the lord chancellor, Viscount Caldecote.

The speech from the throne said the war is being fought to preserve the brightness of liberty.

"Despite the efforts of any government to preserve peace, it is a violation of solemn undertakings, wantonly invaded Poland," the speech said.

"This new instance of German aggression and bad faith was a challenge which we could not have hesitated without dishonor to ourselves and without peril to the cause of freedom and the progress of mankind.

"We seek no material gain. Liberty and free institutions are our birthright which we and our fathers, are resolved to preserve."

"The House of Commons was thanked for the prompt and understanding acceptance of heavy financial burdens which 'has deeply impressed the world and demonstrated the unflinching determination of my people to make every sacrifice necessary for victory.'"

Independence Demanded

Price Asked For Co-operation By India's Congress Party
Bombay.—Mohandas Gandhi demanding a pledge of India's independence as the price of co-operation in the war, declared that he would not accept, for owing to her material and military controls, Britain is able to regulate garrisons and drain India's wealth at will.

The Indian National Congress met at Allahabad with a committee of the Congress party seeking to influence the country's attitude toward the war.

The Moslem league, second largest political party in India, has endorsed the white paper of Oct. 17, deferring discussion of India's status until after the war, Gandhi and the Congress party found this statement unacceptable and demanded "a declaration to free India from bondage."

Of the 11 provincial governments, eight dominated by the Congress party have resigned in protest against the British position.

Plenty Of Work

Textile Factories In The East Are Working Full Time
Toronto.—Textile factories in Hamilton, London and Stratford are working full time and in some cases double shifts are operating to turn out war orders, according to the weekly report issued by Hon. Norman Hapel, Ontario minister of labor.

At Belleville all half of employees of the Canadian National Railways have been called back. Many railway workers at Hamilton have been called back. Bradford reports 500 fewer on relief than at this time last year.

Toronto.—If present price controlling policies of the Canadian government are continued, price levels will not rise during the present war as they did in the last war. W. G. Nicholson, president, said in his report to the 26th annual convention of the United Farmers of Ontario.

Great War Hero

Major-General Freyberg Will Command New Zealand Forces
London.—A 49-year-old Great War hero of the Dardanelles, Major-General Bernard Cyril Freyberg, was called out of retirement to command New Zealand's overseas forces, announced Wellington government authorities, completion of his first election for service under the Allied command.

The King gave approval of Major-General Freyberg's appointment. At the same time a statement by Michael J. Savage, the New Zealand prime minister, was issued here saying the first election was awaiting announcement when transport would be available.

It was Major-General Freyberg, who, with his skin painted a khaki camouflage, even half a mile from a destroyer during the Dardanelles campaign, carrying flags which attracted the attention of Turkish soldiers.

While they were investigating the forces British troops were landing at other points.

Born in London in 1890 he was educated at Wellington, N.Z. He served in the Great War with the Hood Battalion, R.N.D. from 1914 to 1918 and received the V.C. in 1918. He was a brigadier with the 20th division and after the war to become a general staff officer.

Doukhorob Plan

R.C. Government To Provide Remedy For Land Situation
Victoria.—A government bill will be introduced in the British Columbia legislature to provide a remedy for the Doukhorob land situation in the Kootenays, Attorney-General Gordon Wismar said.

The attorney-general said the government intended to acquire lands under mortgage to the Sun Life Assurance Co. and the National Trust Co. and then make arrangements with the Doukhorobs to acquire title to them over a period of years.

Mr. Wismar said the government planned to turn the lands over to the Doukhorobs to be sold rather than a community basis if they agreed to observe the laws of the province.

Roumania Refuses

Roman Economic Mission Falls To Obtain Better Trade Relations
Bucharest.—A German economic mission left for Berlin by plane after the Roumanian government refused to devalue its currency, the crucial point of negotiations by which Germany hoped to obtain a greater share of Roumanian raw materials in trade.

Germany sought to give the mark greater purchasing power in Roumanian goods, but the Roumanian government refused to lift the embargo on export of oil seeds to the Reich.

Koumania also refused to provide bank cards for shipments from her oil wells to Germany, a concession Germany wanted to secure in exchange for Roumanian petroleum reserves.

The government did agree, however, to lift the embargo on export of oil seeds to the Reich.

Licensed Air Services

Canada Now Has 59 Which Cover Wide Range
Ottawa.—Since the licensing of airlines by the board of transport commissioners came into effect on Nov. 11, there have been 59 licenses granted.

The licensed air services ranged from transcontinental organizations like Trans-Canada Air Lines down to small bush operators with a single plane.

The transport commission license is merely a franchise to operate as a public carrier.

To Increase Production

New Zealand Government Using Public Works Men On Farms
Wellington, N.Z.—The New Zealand government will transfer men from public works to farm work as a means of increasing production.

Labour Minister J. C. Webb announced more than 5,000 men soon will be taken from government work to do farm work. Their wages will be subsidised by the government to the extent of 75 per cent.

Protect Timber Reserves

Montreal.—The Canadian Forestry Association will extend next year its campaign for the preservation of Canada's timber resources and particularly their protection against fire.

Robson Black, vice-president and manager of the association, announced.

Research Work

Science In Army To Be Under Direction Of Bunting
Toronto.—A group of leading Canadian scientists headed by Sir Frederick Bunting is conducting research work to apply the resources of psychology to heightening the efficiency of the Dominion's armed forces.

It is understood the research at first will be directed toward efficient placement of the men, with regard to their suitability for certain technical work, after they have enlisted in the air force.

Whether the work will be extended to other branches of the armed services depends on the success of preliminary work now being done.

Whether the work will be extended to other branches of the armed services depends on the success of preliminary work now being done.

WAR CABINET POST IS CREATED IN MANITOBA

Winnipeg.—Creation of a portfolio in the Dominion-provincial relations in the Manitoba government was announced by Premier John Bracken.

The new cabinet post is the first in any provincial legislature in Canada. The purpose of the new portfolio is to facilitate the utmost co-operation in provincial and federal activities during the period of war.

Mr. Bracken said. Duties of the new minister will be taken over by the premier.

Four other changes in the cabinet were announced.

William Morton of Gladstone, Man., member of the Manitoba government for 12 years, was appointed minister of commerce.

Mr. Morton is vice-president of the Manitoba Liberal Association and has been government whip for the last three years.

The municipal commissioner's post was left vacant when Hon. W. J. Major was forced to take three months' leave-of-absence under doctor's orders.

Hon. S. S. Garson, provincial treasurer, was made acting attorney-general, also held by Mr. Major.

The post of provincial secretary, formerly held by Premier Bracken, was transferred to Hon. J. S. McDermid, minister of mines and natural resources.

Hon. W. R. Clubb, minister of public works, was appointed minister of telephone.

Mr. Morton's appointment brought the Manitoba cabinet to eight ministers.

Formation of a war-time advisory committee on agriculture for Manitoba, comprising four members representing all phases of agricultural production in the province, was also announced by Premier Bracken.

The committee would be devoted to mobilizing Manitoba's farm production behind the national war effort.

Membership includes Paul F. Brett, president of the Manitoba Pool Elevators; L. D. G. MacFadden, vice-president of United Grain Growers; and J. C. Webb, manager of Canadian Livestock Co-operative.

Western Ltd., and L. W. Brockington, B.C. county, and Northwest Grain Dealers' Association.

Mr. Bracken said the committee would be devoted to mobilizing Manitoba's farm production behind the national war effort.

Alberta Air Fields

Ten Additional To Be Constructed In The Province
Edmonton.—Agreement has been reached between the province and Dominion under which 10 additional airfields will be constructed in Alberta.

The airfield pact with Ottawa provides that the province will supply all the surveys, engineering facilities and necessary equipment for these fields, said Mr. Fallow.

"These airfields will be constructed along the line of the Trans-Canada Airlines from Wainwright to the western provincial boundary of the Crowns Nest Pass and also along the line from this city to Lethbridge," said Mr. Fallow.

Work under this program has begun and it will be rushed to completion, said the minister.

Details of the proposed use of the fields were not disclosed but in all probability they will be used in connection with the Empire air force training scheme.

Training Pilots

More Than Half Of The Pilots Required By Alberta To Be Trained Here
Toronto.—Canada will train more than half of all the pilots required by the Allies in the war, Hon. C. D. Howe said in a banquet address.

"Recently Canada has been asked to train a gigantic training school for pilots, with responsibility for training more than half of all the pilots who will be required in the war," the Dominion transport minister said.

He said the government had agreed to train more than half of all the pilots who will be required in the war, Hon. C. D. Howe said in a banquet address.

"Recently Canada has been asked to train a gigantic training school for pilots, with responsibility for training more than half of all the pilots who will be required in the war," the Dominion transport minister said.

GERMAN PLANE TOLL IS HEAVY ON WESTERN FRONT

Paris.—An unofficial count of German planes downed on the Western Front since the beginning of the war showed that the Allies were within three of their 100th plane.

British aviators accounted for nine German planes in two days as cloud weather brought increased air activity.

French flyers machine-gunned 11 German Messerschmitts out of the air in three days, reliable reports from the front said.

This was believed to bring the toll of enemy planes to at least 97.

In the intensified air warfare reports have indicated that British and French planes have come out of beat in dogfights over the Western Front during the last few days.

Corresponding with the British Royal Air Force reported seven German bomber reconnaissance machines were shot down by machine-guns and incendiary bombs on the Western Front, all the British planes returning to their bases.

Seven aircraft were shot down by the Royal Air Force in France. The British aircraft also shot down an R.A.F. plane but by enemy machine-gun fire and compelled to land and another was damaged but reached its own airbase.

BRITISH PROGRAM TO TAKE CARE OF MINE WARFARE

London.—The British program to combat German mine warfare will be carried out by the Royal Air Force, which will be required to train more than half of all the pilots who will be required in the war, Hon. C. D. Howe said in a banquet address.

"Recently Canada has been asked to train a gigantic training school for pilots, with responsibility for training more than half of all the pilots who will be required in the war," the Dominion transport minister said.

THE POWER OF SKIN

CHAPTER IX.—Continued

It was the last month of the northern movement of the great central herd that winter in the forests. Already deer and fauna had preceded the backs to the cool wind-whipped barrens where the mosquito pest and bot flies are less troublesome. But the canoe bound for the River of Skulls did not linger in the high plateau country. They had ample provisions, with the river fish, and their goal was too far and the summer too short.

Then, one day, the country ahead began to fall away, the valley narrowed, and a muffled roar reached their ears from below, where the river entered a long, rocky gorge. Landing, Alan and Noel went ahead over the boulders and gravel at the head of the gorge to inspect the water. Hours later they returned. For five miles they had followed the shores of the gorge jammed with boulders piled high by the ice and found the river impassable to a canoe. For three days they slaved with the canoe and outfit over rocks and boulders, Heather insisting on doing her share of the portaging with the tump-line strap over her blonde head. Below the canyon the canoe was again put in and shortly the river widened into a lake where they camped for a day's rest.

There is no spring on the high Ungava plateau. Winter dies hard with occasional snow flurries and frosty nights in June, then summer, the magician, touches the land of the tundra overnight with its wand. Myriad flowers spring to life. The rolling barrens between the innumerable lakes and rivers become gray-green carpets of caribou moss, velvet to the feet, splashed with the white blooms of the lake-apple and service berries, the pale rose of the fragrant twin-dwarf and the pink patches of the Irok.

And now summer had come to the wild valley of the Kokosak, and almost daily, rainbows arched the river, for Ungava is the land of rainbows.

"When are we going back to look for caribou on the barrens, Alan?" asked Heather as the first vanguard lay on the warm sand beach before the two small travelling tents with

FOR CHAPPED SKIN

MENTHOLATUM

cheese-cloth mosquito linings. "To like to see the country up there."

Alan opened his eyes where he dozed in the sun to consider the graceful figure of the girl near him. How many women could have come down the river of hardship behind them and hardly look tired. He thought of the girl back at Fort George, so lovely in her dark, feminine way. But compared with the tall girl who lay near him on the warm beach, Berthe was frail, too soft for hardship.

"Were we close to the?" asked Noel who had been staring for some minutes at the hills to the north.

"In the tent on my clothes rack," Noel got the glasses and sitting down on the beach began to sweep the distant ridges below the lake. After a signal he announced, excitedly:

"Smoke sign—do we river?"

"If that's smoke and not haze then it's Indiana," replied Alan, getting to his feet.

"No haze—idiot!" insisted Noel, his eyes fringed to the glasses while Heather and Alan stood beside him. "Doesn't go again? Tree puff, it tells you," he cried excitedly. "De Injun sign read a blanket!"

"Let me have a look!" Noel handed the binoculars to Alan.

From a blue ridge down the river valley Alan shortly saw a column of smoke, as he cut off. Presently this was followed by another column and this, later, by another. There was no mistaking it. This was the first of the smoke signalling by alternately holding a blanket over the fire and removing it, to separate the puffs.

"Where's John?" "Over at the outfit fishing for salmon," replied Heather.

"There! There! The answer from the farthest blue hill, on this side of the valley! See it, Noel?"

Noel took the glasses. "Ah-hah," he said. "I see it."

"We'll do a little signalling ourselves." And Alan and Heather's white sweater to a paddle and waded it back and forth to the man a mile away in the canoe. When the canoe was seen to head towards camp, the two men and the girl started hurriedly to roll their tents and get the outfit ready for the canoe.

"What's the matter?" demanded the curious McCord, reaching them. "There are Indiana signalling from a hill below here. They may be hunters who have found deer and are telling someone across the valley. Then again they may have seen us and are starting to head us up. We've got to get downstream, put them!"

"How about McQueen?" "If I know anything about canoeing, McQueen's fifty miles behind us, John. This is Naskapi!"

Calling the dogs who were hunting back in the scrub, they loaded the canoe and started for the outlet. For a few miles below the lake there was good canoe water; then, when the Peterboro was abreast of the ridge communication, in the form of hollow brass tubing between guard stations.

Snakes are regarded as guardians of treasure in India.

maintained at the boat with Heather watching the shores for a possible ambush. Shortly Noel waved them on and they "snubbed" the boat downstream with their poles and picked him up.

"It took bad but we can run down," was the report.

"We've got to run them," insisted Alan. "They can shoot us out of the boat from the shore, here. We've got to get out of this country!"

"That's right, Alan!" agreed McCord, a soothing arm circling the shoulders of the girl who stood gripping her rifle, her frightened eyes patrolling the opposite shore.

"Ah-hah! We go!" The Peterboro caught the suck of the first drop and was into the mass of the white water where the river boiled and churned and lashed itself into frenzy of foam and flung spume until hidden by a rocky bend.

Following black water channels past boulders over which the stream water mounded high to burst into cascades of spray; missing, by the width of a paddle, upbumps and splinters of rock where the river thrashed itself into white fury; dodging knife-edged ledges that would flip the bottom from nose to stern; the Peterboro roared and plunged past the menacing shores where hidden Naskapi could pour upon them a withering fire.

On down the river they pushed through the day and into the long twilight, putting the canoe between the canoe and the hills of the signal smoke. The duck was beginning to pack the spruce of the shore when the first canoeing began to look for the place to camp. At a widening where the river bed was strewn with boulders but the water not strong, the bowman swung the nose of the canoe toward the beach.

With a hundred feet of the shore, the Peterboro with its heavy load rode upon a submerged boulder and, before the crew could save it, rolled and went over the edge.

"Save the flour and pemmican!" Don't let the pemmican sink!" cried Alan as he hurried to the shore. The boat, "Are you all right, Heather?" he asked to the girl who had been thrown wide and was swimming back to the canoe, glowing on its caught bow with the current.

"All right!" answered the girl, who swam like a fish.

"Get her bow off, quick, before we lose our lot!" "I've got it!" yelled the giant, standing on the submerged rock as he heaved and freed the bow.

Frankly the crew worked, in water like ice, to bring the half-drowned craft ashore. They were shortly in shoal water where they freed the precious pemmican, flour and provision bags from their lashings and put them on the beach, then emptied the canoe.

"Any paddles gone?" cried Alan. "Mine and Heather's," answered McCord.

"Come on, Noel, they'll drift ashore in that bend!" And the two boys, leaping into the canoe in the fast-fading light, hurried away. They were back shortly with the lost paddles.

Then while a fire was kindled the four bags were examined. "The water got to two bags," mourned Alan, "but we'll have some good food tonight." "If we work quick enough!" The pemmican's all right!"

They opened the wet bags and removing that flour had been drenched by water, placed it in spare bags, then spread their outfit out to dry by the fire. Owing to the fact that everything of value in the canoe was lashed to the thwarts they had lost nothing except the water. Half of that was ruined.

While the steam rose from their wet clothes and their smoke hung on a shroud suspended by sticks, they stood in their bare feet drying out beside the fire.

(To Be Continued)

Making Them Attractive

Children Delighted With New Mickey

Special "Mickey Mouse" gum masks are being distributed for London children to solve the problem of getting children to wear the ordinary grim looking mask.

The new masks are made in different colors and have two separate eyes and a small protruding piece of rubber as a nose.

In the although of Wandsworth where distribution has been completed, an Air Raid Precautions official declared: "The children love them and the mothers are having a hard job trying to convince them they are not merely playthings."

The Great Wall of China built in the third century B.C. was equipped with a crude forerunner of telegraph communication, in the form of hollow brass tubing between guard stations.

Snakes are regarded as guardians of treasure in India.

The Fighting Irishmen

Thousands Going Voluntarily To Enlist In British Army

The Argonaut, San Francisco, says: Although Ireland, or Eire, to give the Emerald Isle its present name, is now an independent nation and free of England, the young Irishmen, according to Oswald Garrison Villard, who is watching the scene in London, are enlisting in the British army by the thousands, and the steamers that go from Ireland to England are full of them. The government of their country has proclaimed its neutrality, but these young men do not intend to be neutral when there is a prospect of a thumping good fight, and their inclination is to fight for England now as they have ever fought for her in the past.

England has never had any better fighters in her army than the Irish soldiers, and is never likely to have. Both the Irish and the Highland Scots belong to a fighting race and the Germans in the last war called the killed Scots "the lilies of hell." If war must be it is well for the democratic nations to have in their armies men who have this instinct for fighting in their blood. During our Civil War the Irish in the North and the Irish in the South fought for their respective sections with an ardor that commanded the admiration of their commanders.

Have Long Memory

Will Geese Choose Feeding Grounds That Prove Fairly Safe

Will Geese would appear to be in the same class as elephants when it comes to remembering. And that's why, my sportsman, at Quill Lake, Saskatchewan, there have been few geese on the Big Quill lake for many years.

In Vynyard, a local nindrod was bemoaning the lack of geese, and a farmer of the district came forward with the explanation.

Ten years ago, a party of "sports" in boats sailed over the Big Quill one night after dark, turned spotlights on the geese resting in the middle of the lake, and shot scores of the startled birds before they could take to flight.

Since then, few geese have settled on or near the Big Quill to feed in the fall.

The explanation appears to be that the old geese who lead the flock remember that night, and give the scene of the massacre a wide berth. Local bird observers say that this will be the case for many years to come, since a goose lives to be 50 or more years of age. The older geese invariably fly in the van of the "v" formation, and they change the feeding grounds which, in their experience, have proved to be comparatively safe.

The Penguin Post

Daily News Sheet To Be Issued For Byrd Expedition

For news of the world, as well as of the expedition, the members of the United States Antarctic Expedition will consult the "Penguin Post." This will be a mimeographed sheet issued once a day, as edited by Roger Harrison, an official of the expedition, who formerly was a reporter for the Associated Press.

"We'll have stories based on radio messages from the United States and also reports of activities at each of the two bases," said Hawthorne. "Don't expect we'll have to 'retype' very often."

Big Coal Field

M. P. Johnson, member of a Calgary syndicate, said the syndicate had begun operating a coal mine containing semi-anthracite type of coal similar to that mined in Pennsylvania. Mr. Johnson said he believed 10,000,000 tons could be mined in the area, 20 miles west of Turner Valley oil field.

The heaver can take in enough air to remain under water about five minutes.

England to-day is spending less money on groceries and more on meat, including poultry and rabbit.

Canada's MONEY-SAVING RADIO "B" BATTERIES

PRICES sharply reduced ON THESE TWO FAVORITES

This large size "Super-Layerbilt" "B" battery (No. 386) presents you with the best buy! In the radio battery market, Exclusive layer construction giving longer life and extra power at a new low price. \$3.70

The medium size "Super-Layerbilt" "B" battery (No. 385), is an excellent buy, where first cost is the prime factor for 4 or 5 tube sets. It is also an ideal choice for use with all new 1.4-volt radios. An added feature is the new low \$2.40 price.

"Eveready" "Super-Layerbilt" "B" batteries are built in layers. They last longer because this exclusive construction permits no waste space, every inch being at work producing power.

If you seek longer life, more power, and more hours per dollar of cost, choose either of these two nationally popular batteries illustrated above.

Vegetarians And Rationing

Those Who Do Not Eat Meat Ask For A Substitute

The Vegetarian Society from its Manchester headquarters, has issued a leaflet on the question of rationing as it affects vegetarians.

The latest statement made by the Ministry of Food says that "when food rationing is introduced arrangements will be made whereby vegetarians will be able to surrender their meat and bacon coupons at the local food office and receive in exchange coupons which will entitle them to an extra supply of fats."

In answer to an inquiry about supplies of margarine meeting the requirements of vegetarians, the Ministry of Food has advised them to obtain supplies of margarine from special health food stores and other similar establishments. No special vegetable margarine will be distributed through the ordinary trade channels.

The society has been pressing for the provision of a special protein ration for vegetarians, so far without success, and has pointed out that nuts, mainly imported, are an essential food to vegetarians—Manchester Guardian.

Judge: "Your profession?" Witness: "Agricultural expert."

"What was your father?" "A farmer."

"And your grandfather?" "A peasant."

Crude stone implements known as "celts" represent the earliest known handiwork of man. They were chipped out by cave men at the beginning of the Stone Age.

EDOUARD J. ROULEAU,
Editor and Publisher

THE TOWN CLERK

The clerk in a great majority of
cases is the man who really keeps the
machinery of a municipality in operation.
Every year or so new men are
elected to positions in the council.
They must receive instruction and guidance
from someone, and this someone
is usually the clerk. A councillor or
alderman is moved up to the receiving
ship of the mayor's chair and he is
"green" about his new duties. The
clerk sets him right and usually keeps
him that way.

Municipal councils couldn't get started
and keep going without the clerk.
He is the "power behind the throne."
And if he has tact and good judgment
and uses common sense the municipality
is generally given credit for having
a good council.—Hanna Herald.

Hiram walked four miles over the
hills to call on the girl of his dreams.
For a long time they sat silent on a
bench by the side of her log-cabin
home; but soon the moon had lost its
effect, and Hiram sidled closer to her
and picked up her hand.
"Mary," he began, "I've got a good
clever" over that and a "team and wagon,
an' some haws, an' I calculate on
building a house an'—"

Here he was interrupted by Mary's
mother, who had awakened.
"Mary!" she called in a loud voice.
"Is that you, man that yit?"
"Back coms the answer: "No, ma,
but he's gittin' thar."

Buy Your Needs in Carbon!

DO YOUR CHRISTMAS SHOPPING EARLY!

There is not a year that passes, but
what some editor does not advise his
readers to do their Christmas shopping
early, but this is sound advice and
we are reminding you that it pays to
shop early. If one waits till the last
minute there is always that eternal
rush and if you cannot get what you
want there is no time to lose and you
either get something that will not be
a suitable gift or something that will
not be appreciated. Shop early and
you will not be disappointed. It is
only about four weeks to Christmas
and the time soon goes. The stores
will commence their Christmas adver-
tising in the next week or so and
if you are not sure of the gifts you
want or ought to buy, watch the ad-
vertising and you will not be disappointed
in the suggestions they have to offer, or
the model they have to sell for an ad-
vertised article is always guaranteed to
be what it is represented.

IN MEMORIAM

In loving memory of Joseph Sherry,
who passed away November 26, 1937.

Two years have passed since that
day and day.

The one who was called away.
God took him home, it was His will,
But in our hearts he lives still.

Ever remembered by his
Wife and Family

PENALTIES ADDED ON UNPAID TAXES AFTER DEC. 15

Take notice that all taxes are due
and payable on December 15th, 1939.
5% discount will be allowed upon pay-
ment of current taxes up to this date.
After December 15th a penalty of 5%
will be added to all unpaid taxes.

CARBON SCHOOL DISTRICT,
ALEX. REID, Sec.-Treas.

Snicklefritz....

Hubby—Darling I think you spend
altogether too much money in get-
ting your hand red.

Wife—And, dear I think you spend
altogether too much money in getting
your nose red.

A local girl won't go out with an
engineer because the last one she went
out with left blue-prints all over her.

Jack: "What do you say to a little
kiss?"

Ruth: "I've never spoken to one."

Counsel (to the police witness):
"But if a man is on his hands and
knees in the middle of the road that
does not prove that he is drunk."

Police man: "No, sir, it does not. But
this one was trying to roll up the
white line."

Specialty Salesman: "I'm out scratch-
ing for a living."

Housewife: "I'm sorry, but I don't
like it."

Poetic Old Salt: "My heart is in the
ocean."

Senile Boot (as he took a farmer
from the rally): "You have given me
one better, my friend."

Rustus: "I see your mule has 'US'
branded on his hind quarters. Was he
in the army?"

"No, boss, but US don't stand for
Unité. Sum-it means unite."

"My dad's a bookkeeper," said little
Immy proudly.

"I know it," said little Mary. "He
borrowed one of Daddy's books three
months ago."

What do you do when the world is
gray and gloomy?

Jim—I deliver the milk.

Small Ma'd returned from Sunday
school with a picture card in her hand.
"What is that you have?" asked her
father.

"Oh, just an ad about heaven," she
replied.

"Professor, would you come down to
my fraternity house for dinner to-
night?"

"Now, now, don't worry. I'll pass
you in the course without your poison-
ing me."

CREDIT HOUSES SHOW DEFICIT ON FIRST YEARS OPERATION

EDMONTON—Operation of provincial
treasury branches showed a deficit
of \$62,692 up to March 31 last, ac-
cording to the public accounts for the
last fiscal year, just issued by the pro-
vincial government. There are some
39 branches in the province.
Expenditures included \$7,144 for
payments of the depositor's bonus.
This bonus is credited to a depositor's
account monthly when at least one-
third of total purchases during the
period is shown to be Alberta-made
goods.

Among other expenses in the last
fiscal year were \$31,450 for salaries,
\$11,117 for maintenance of buildings,
\$5,429 for travelling expenses, and
\$1,132 for agent's commissions.

Only item of revenue was \$1,506
from commission and exchange earn-
ings. Total expenditures amounted to
\$64,198, leaving a deficit of \$62,692.

Economical Housewives

There was a day when the
housewives bought the far-
away "bargain" in the belief
that it was good business to
save a few pennies. But ex-
perience taught them a few
things. Today's housewives
do not buy blindly. They
examine the article first and
when satisfied with the pro-
duct they pay a fair price
at home. It is economical to
make your purchases in
